

Information Security Policy

D.D. SYNERGY implements an Integrated Management System that includes **Information Security**, complies with the **ISO 27001:2022** standard and is committed to:

- Ensuring the confidentiality, integrity and availability of information processed, stored, transferred electronically or physically through the company's personnel and information systems.
- The timely and rapid identification and response to emergencies related to a breach (or potential breach) of the company's information security.
- Ensuring the information security policy and information security objectives that have been established and are compatible with the company's strategic direction.
- The protection of the company's investment in information and communication technologies.
- Compliance with the requirements of Greek and European Legislation on personal data management, confidentiality of communications, copyright, etc. in its field of activity.
- The continuous improvement of the Information Security Management System.
- The definition of business requirements regarding the availability of information systems.
- The definition of stakeholders and internal / external issues related to the company's operating framework.
- The implementation of a risk assessment process to identify threats and opportunities.

The Top Management of **D.D. SYNERGY** has the necessary resources to support the Integrated Management System related to Information Security, provides the necessary knowledge to its personnel and sensitizes them on issues of information security, utilizing their skills and abilities.

D.D. SYNERGY fully recognizes the objectives of the Integrated Management System related to Information Security and supports their implementation.
